PROFESSIONAL SUMMARY

I am a dedicated Computer Science Engineering student with a strong focus on machine learning, IoT security, and innovative tech solutions. Having contributed to significant projects, including an AI-powered authenticity system and an advanced IoT framework, I am passionate about leveraging technology for real-world applications. With a 3-Star ranking on HackerRank and a dedication to continuous learning, I aim to make a meaningful impact in the tech industry.

EDUCATIONS

Vellore Institute of Technology

Bachelor of Technology in Computer Science Engineering

Jul 2024 - Jun 2028

CGPA : 8.93/10

Chellammal Vidyalaya Senior Secondary School

Class XII Schooling

Apr 2023 - May 2024

CGPA : 93%/100%

SKILLS

Programming Languages : C, C++, Java, Python, JavaScript
Frameworks & Libraries : React, Django
Tools & Platforms : Git, GitHub
Databases : MongoDB, NoSQL, MySQL
Soft Skills : Communication, Problem Solving, Teamwork
Languages : English

AWARDS & ACHIEVEMENTS

Automated Authenticity Verification System for Ancient Tamil Inscriptions

May 2025

- Developed an **AI-based authenticity verification system** for ancient Tamil inscriptions to support **digital cultural preservation**.
- Patent:** Accepted for publication (under publication).
- Completed a **Summer Research Internship** contributing to the research and development of this project (May 15 - July 15).

Lightweight ML Framework for IoT Security

Oct 2025

- Developed** a lightweight **machine-learning-based** Intrusion Detection Framework, addressing critical issues in **IoT Cybersecurity**.

1st Place – Citywide Engineering Innovation Competition.

Jan 2024

- Designed a structural earthquake stability solution for buildings, addressing real-world safety challenges. Awarded ₹50,000 and trophy for the best practical solution.

PROJECTS

Hyperparameter Optimization — FOSSEE Toolbox

Jan 2025 - Feb 2025

Internship

- Integrated** automated **hyperparameter tuning workflows** to enhance **ML experimentation efficiency** within the FOSSEE ecosystem using Scilab.
- Received internship certification and open-source contribution acknowledgment with copyright transfer for approved work.

Technologies / Tools Used : Scilab

AI-Powered DAO for Decentralized Talent Funding

Mar 2025 - Mar 2025

Hackathon project

- Explored** domains in **blockchain governance**, **incentive-driven funding models**, and fairness-based evaluation frameworks.
- Developed** conceptual architecture and system design from a systems and socio-tech perspective.

Technologies / Tools Used : blockchain, Node.js

Context Drift Validator in Zero Trust Library

Dec 2025 - Feb 2026

Research

- Developed** a context drift validation module using **ns-3** to simulate secure network environments.
- Implemented** continuous trust verification based on **Zero Trust Architecture** to detect abnormal device behavior.
- Enhanced** network security by dynamically validating node behavior and identifying potential security anomalies.
