PROFESSIONAL SUMMARY

I am a Computer Science Engineering student at VIT Chennai specializing in Data Science, Machine Learning, Artificial Intelligence, and Backend Development. Experienced in building AI-powered applications using Python, FastAPI, LLMs, RAG, SQL, and cloud technologies. Passionate about solving real-world problems through data-driven solutions, intelligent automation, and scalable software engineering.

EDUCATIONS

Vellore Institute of Technology Chennai	Jul 2024 - Jun 2028
<i>Bachelor of Technology in Computer Science Engineering</i>	CGPA : 8.95/10
Chellammal Vidyalaya Senior Secondary School The Hindu Colony	Apr 2023 - May 2024
<i>Class XII Schooling</i>	CGPA : 93%/100%

PROJECTS

BharatVerse – AI-Powered Cultural Heritage Platform	Jul 2026 - Jul 2026
<i>Hackathon project</i>	
- Interactive Digital Twin dashboard with 10+ analytics modules for real-time visualization of national AI insights, city analytics, and decision-support systems. - Developed the frontend architecture using React and Tailwind CSS, creating a responsive, scalable, and intuitive interface while integrating 15+ backend APIs into a production-ready dashboard. - Addressed the lack of a unified platform for real-time monitoring of critical national systems through an AI-powered Digital Twin dashboard.	
<i>Technologies / Tools Used : React, Python, Gemini API, LLM Applications</i>	
PinIt – Community Notice Board  Github	Jun 2026 - Jun 2026
<i>Production Project</i>	
- Built a full-stack campus community platform with smart notifications, keyword subscriptions, team finder, and secure JWT authentication. - Developed backend APIs, database integration, and authentication workflows to improve campus communication and user engagement.	
<i>Technologies / Tools Used : Node.js, React, Express, PostgreSQL, JWT</i>	
CodeSense – AI Developer Copilot	May 2026 - May 2026
<i>Research</i>	
- Developed an AI-powered developer copilot that enables repository-level code search, analysis, explanation, and chat using RAG and Large Language Models (LLMs). - Designed FastAPI backend APIs and integrated RAG-based AI pipelines for intelligent repository search, analysis, and conversational code understanding.	
<i>Technologies / Tools Used : python, FastAPI, Gemini API, RAG, LLMs</i>	

SKILLS

Databases :	MongoDB, NoSQL, MySQL, PostgreSQL
AI / Machine Learning :	Machine Learning, Data Analysis, Statistics, XGBoost, Random Forest, MCP, LLM Applications
Frameworks & Libraries :	React, Django, Tailwind CSS, Node.js, Express, FastAPI
Programming Languages :	C, C++, Java, Python, JavaScript
Soft Skills :	Communication, Problem Solving, Teamwork, Leadership, Decision Making
Tools & Platforms :	Git, GitHub, Linux, Scilab

WORK EXPERIENCE

Context Drift Validator in Zero Trust Library	Feb 2026
<i>Website link: https://apps.nsnam.org/app/zero-trust-iot/</i>	
- Developed the Context Drift Validator for the NS-3 Zero Trust Library, enabling continuous trust validation and context-aware authorization in simulated IoT environments. Contributed to research supporting three patent filings while serving as a core contributor and maintenance team member for the official Zero Trust IoT Library, released through the NS-3 App Store.	
Automated Authenticity Verification System for Ancient Tamil Inscriptions	May 2025
<i>Research</i>	
- Developed an AI-based authenticity verification system for ancient Tamil inscriptions to support digital cultural preservation. Contributed to research supporting three patent filings, currently under publication. - Completed a two month Summer Research Internship contributing to the research and development of this project (May 15 - July 15).	
Hyperparameter Optimization — FOSSEE Toolbox	Feb 2025
<i>Official Website link: https://scilab.in/case-study-project/completed-case-studies</i>	
Integrated automated hyperparameter tuning workflows to enhance ML experimentation efficiency within the FOSSEE ecosystem using Scilab. - Received internship certification and open-source contribution acknowledgment with copyright transfer for approved work.
